

YORK EBOR MEETING 2016

Trainer Notes

Introduction

What follows are some trainer stats/pointers for this week's York Ebor meeting. I have taken an in-depth look at the five trainers with five or more winners during the last 4 meetings.

As always these stats are only ever a starting point. The stats are the stats so to speak but all of our interpretations may be different- some will put more weight than others on certain stats. Inevitably some of the numbers are very small and should be treated with caution.

However, there are some decent pointers that follow. I hope they help point the way to a few winners this week.

Firstly an overview of those trainers with 5 or more winners at the last 4 festivals and some selected others including some who could do better... Stats from 2012> (2012/13/14/15)

NOTES: Clearly all of William's runners at this meeting are worthy of close inspection. There are some further pointers below. Some caution, and only that at this stage, in terms of the virus possibly doing the rounds in Newmarket. This appears to be contained to Varian's yard but it is something to keep an eye on with all Newmarket trainers.

All stats in 'positive' and 'negative' sections DO NOT include odds caps. The stats refer to all runners.

(0/4, 1 places last year. Hopefully 2015 was just a blip)

This angle appears to home in on the ideal profile for Ryan's winners here, albeit in truth there are many pointers above and you could probably slice and dice many ways. The market does seem to be important and this angle is very much a guide.

There are plenty of pointers for Ryan's runners.

(All previous research was for the last four festivals. What follows now includes 2011- which is just an oversight on my part. So, for O'Meara, Bin Suroor and Cumani you get the last five years)

There isn't much as a 'profile way-in'. Once you introduce a 12/1 odds cap there are not too many stand- out stats. There are a few pointers above to help.

 - 46+ days: 0/6, 1 place

Winning Profile?

Cumani's overall stats are decent enough here and there are some decent pointers/ 'micro angles' above. You could focus on...

- 7f-1m4f
- 0-2 runs in last 90 days only

15 bets / 5 wins / 9 places / 33% sr / +48 SP / +68 BFSP / AE 3.16

If you looked at those that had a run and left those that were moving down 1 or up 1 class you are left with: 4/8, 6 places... +29 SP (+ another maiden winner)

That is all for these York Ebor Notes. I hope you find them useful in some way. Hopefully the five main trainers have their strings in good form and can build on recent performances.

Happy Punting,

Josh
