

Trainer Track Profiles: Jumps 2016/17: RESULTS

What follows are results for my Trainer Track Profiles Guide, starting on Saturday 24/09/16.

I have recorded results from the General Race Types stats and the Micro angles.

Results are recorded for both multiple qualifiers (those that appear at least once in General Race Types and Micro Angles. Horses only counted a maximum of twice) and if you were to just back every qualifier to 1 point win stakes, regardless of how many times they appeared.

All results are recorded if backing every selection systematically, regardless of any consideration of the horse, the race, the market or other meaningful information. My 'Notes' aim to elaborate on runners to help you come to a decision on whether to back them.

I have no idea if history will repeat itself and whether this portfolio will work systematically. I hope they do. But some caution is advised. These stats will highlight winners. I think they should be a useful guide moving forwards but it will be clear from the following results, as they build up over time, whether that is the case.

It's safe to say I would take this Week One total every week...

Summary

Week 1 Totals:

General Race Types: 6/30, 9 places = +15.75 points

Micro Angles: 2/ 13, 5 places = +13 points

Total including multiple qualifiers: 8/43,14 places = +28.75

Total 1x 1 point only : 6/39, 11 places = +9.75 points
