Trainer Track Profiles: JUMPS 2017/18

Introduction

What follows is my new trainer stats report for the 2017/18 'winter' jumps season. This report covers every jumps track in the UK excluding those that are 'summer only'. It also excludes Hereford due to a lack of data. The track only reopened last year.

All qualifiers posted in section 1 of the Members' Club, for the 'Jumps', originate from this report. It **IS NOT** advised to simply back all qualifiers that this report throws up. These qualifiers should be viewed as starting points, and form the basis for the advised strategies and any further analysis you may choose to undertake.

The research period covered was from the 1st January 2014 through to October 2017.

All stats refer to 'standard' handicap hurdles/chases unless otherwise stated. (ie the NHF and Novice Handicap stats) Stats for the two micro angle sections, as per the template below, refer to standard handicap hurdles + chases only.

This report is the result of approximately 40 hours research. All angles included had a minimum 20% win strike rate. This was the main guiding criteria. From there I have used my experience to decide which trainers to include, taking account of numerous factors.

Each stat has been analysed across all years in the research period, including the list of horses that make up each stat. I have been careful to ensure that a stat is not skewed by one good year, one big winner or just one or two horses.

All tracks are listed alphabetically. The easiest way to find a track is to press *Ctrl F* on your keyboard ,at the same time, and type the name of the track in the search bar that appears.

And that's it I think.

I will record a short video to expand on some of those points above and talk through the template. This can be found in *The Key*, within the Members' Posts.

If you have any questions feel free to email me or post a comment in today's Members' Post.

Happy Punting,
Josh
